Hi Excellent Teachers at the Mt. Washington School,

Situation

We began to recertify to MAEOE as a green school, but found that as of this time we do not have all of the needed requirements. This means our school's green certification will lapse. We are working with the Office of Sustainability to ensure we can qualify as a green school for the next school year (2018 – 2019).

Green PD

We will need to ensure that the entire staff is aware of what it takes to qualify as a green school. As it pertains to teachers, we will need at least 10% of our teaching staff to have documented, green-qualifying professional development. A list of Green PD is attached below.

Green Curriculum

When we teach green curriculum in the classroom we need to document this as well. Please let me know if you need green curriculum, or need me to scan / take pictures of the work. I am available to document this to streamline the work flow and not add extra work for you.

Please let me know your questions, concerns, and how I may support. Thank you.
